The ""god particle"", the nickname for Higgs boson by Lederman, is a kind of elementary particle that is supposed to exist theoretically by physicists. It is now becoming the center of the whole research of the particle physics, and Lederman calls it the conductor of the universe symphony. Through this book by Lederman, we can not only know about how the modern physicists look for the fundamental particle and many anecdotes in modern history of physics, but also get a deep understanding of the standard model, large theory, superstring, dark matter and other contemporary physics problems, which also include the basic question ""why all the substances have quality"".
