A Semantic Web Primer (Cooperative Information Systems series)

Grigoris Antoniou, Frank van van Harmelen

A Semantic Web Primer (Cooperative Information Systems series) Grigoris Antoniou, Frank van van Harmelen

The development of the Semantic Web, with machine-readable content, has the potential to revolutionize the World Wide Web and its use. A Semantic Web Primer provides an introduction and guide to this still emerging field, describing its key ideas, languages, and technologies. Suitable for use as a textbook or for self-study by professionals, it concentrates on undergraduate-level fundamental concepts and techniques that will enable readers to proceed with building applications on their own and includes exercises, project descriptions, and annotated references to relevant online materials. A Semantic Web Primer provides a systematic treatment of the different languages (XML, RDF, OWL, and rules) and technologies (explicit metadata, ontologies, and logic and inference) that are central to Semantic Web development as well as such crucial related topics as ontology engineering and application scenarios. This substantially revised and updated second edition reflects recent developments in the field, covering new application areas and tools. The new material includes a discussion of such topics as SPARQL as the RDF query language; OWL DLP and its interesting practical and theoretical properties; the SWRL language (in the chapter on rules); OWL-S (on which the discussion of Web services is now based). The new final chapter considers the state of the art of the field today, captures ongoing discussions, and outlines the most challenging issues facing the Semantic Web in the future. Supplementary materials, including slides, online versions of many of the code fragments in the book, and links to further reading, can be found at <http://www.semanticwebprimer.org>. Grigoris Antoniou is Professor at the Institute for Computer Science, FORTH (Foundation for Research and Technology-Hellas), Heraklion, Greece. Frank van Harmelen is Professor in the Department of Artificial Intelligence at the Vrije Universiteit, Amsterdam, the Netherlands.

From reader reviews:

Pamela Dudley:

Book is actually written, printed, or descriptive for everything. You can realize everything you want by a e-book. Book has a different type. As you may know that book is important point to bring us around the world. Next to that you can your reading expertise was fluently. A guide A Semantic Web Primer (Cooperative Information Systems series) will make you to end up being smarter. You can feel more confidence if you can know about anything. But some of you think that will open or reading the book make you bored. It is far from make you fun. Why they may be thought like that? Have you seeking best book or acceptable book with you?

Travis Freeman:

The reserve with title A Semantic Web Primer (Cooperative Information Systems series) has lot of information that you can learn it. You can get a lot of help after read this book. This particular book exist new expertise the information that exist in this book represented the condition of the world at this point. That is important to you to learn how the improvement of the world. This book will bring you in new era of the syndication. You can read the e-book with your smart phone, so you can read the idea anywhere you want.

Ernie Fleishman:

You could spend your free time to see this book this book. This A Semantic Web Primer (Cooperative Information Systems series) is simple to deliver you can read it in the playground, in the beach, train along with soon. If you did not possess much space to bring typically the printed book, you can buy the actual e-book. It is make you much easier to read it. You can save the particular book in your smart phone. So there are a lot of benefits that you will get when one buys this book.

Tara Reynolds:

You can find this A Semantic Web Primer (Cooperative Information Systems series) by browse the bookstore or Mall. Only viewing or reviewing it can to be your solve trouble if you get difficulties to your knowledge. Kinds of this guide are various. Not only through written or printed but additionally can you enjoy this book simply by e-book. In the modern era including now, you just looking by your local mobile phone and searching what your problem. Right now, choose your ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose proper ways for you.
