Tech Manual for Erjavec's Automotive Technology: A Systems Approach, 3rd (Comprehensive Automotive Technology) Jack Erjavec

Automotive Technology, 3E: A Systems Approach is a comprehensive textbook covering the theory of operation, diagnostics, and repair procedures for each system and subsystem of late model domestic and foreign automobiles and light trucks. The new edition is published in full color for the first time, including all new step-by-step photo sequences to help users visualize and identify common repair procedures. The technical content has been both updated and improved. An emphasis is placed upon providing the best possible coverage of key topics virtually all automotive students must know - electricity-electronics, engine performance, steering and suspension and brakes. "Hot Topics" such as the use of diagnostic equipment, hazardous materials management, OBDII, electronic automatic transmissions, anti-lock braking systems, air-conditioning refrigerants and retrofitting, passive restraint systems and many others have been expanded and updated. Key new teaching tools, including 100 full-color transparency acetates, and Power-Point based lecture outlines, have been added to make the teaching package the best available. This textbook is also accompanied by an extensive Technician's Manual including an all-new electronic study guide.
