High-Performance Computational Solutions in Protein Bioinformatics (SpringerBriefs in Computer Science) Dariusz Mrozek

Recent developments in computer science enable algorithms previously perceived as too time-consuming to now be efficiently used for applications in bioinformatics and life sciences. This work focuses on proteins and their structures, protein structure similarity searching at main representation levels and various techniques that can be used to accelerate similarity searches. Divided into four parts, the first part provides a formal model of 3D protein structures for functional genomics, comparative bioinformatics and molecular modeling. The second part focuses on the use of multithreading for efficient approximate searching on protein secondary structures. The third and fourth parts concentrate on finding 3D protein structure similarities with the support of GPUs and cloud computing. Parts three and four both describe the acceleration of different methods. The text will be of interest to researchers and software developers working in the field of structural bioinformatics and biomedical databases.

From reader reviews:

Edward Schanz:

Do you have favorite book? In case you have, what is your favorite's book? Book is very important thing for us to understand everything in the world. Each book has different aim or even goal; it means that guide has different type. Some people sense enjoy to spend their a chance to read a book. They can be reading whatever they have because their hobby is definitely reading a book. Why not the person who don't like reading through a book? Sometime, man or woman feel need book once they found difficult problem as well as exercise. Well, probably you will require this High-Performance Computational Solutions in Protein Bioinformatics (SpringerBriefs in Computer Science).

Jacob Gray:

Now a day people that Living in the era where everything reachable by interact with the internet and the resources in it can be true or not need people to be aware of each facts they get. How many people to be smart in receiving any information nowadays? Of course the solution is reading a book. Studying a book can help people out of this uncertainty Information specially this High-Performance Computational Solutions in Protein Bioinformatics (SpringerBriefs in Computer Science) book because this book offers you rich info and knowledge. Of course the data in this book hundred percent guarantees there is no doubt in it everbody knows.

James Wendler:

You are able to spend your free time to learn this book this book. This High-Performance Computational Solutions in Protein Bioinformatics (SpringerBriefs in Computer Science) is simple bringing you can read it in the park your car, in the beach, train and soon. If you did not have got much space to bring the actual printed book, you can buy the actual e-book. It is make you simpler to read it. You can save often the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.

Michael Palmateer:

With this era which is the greater man or woman or who has ability in doing something more are more valuable than other. Do you want to become among it? It is just simple strategy to have that. What you should do is just spending your time almost no but quite enough to have a look at some books. One of many books in the top collection in your reading list is usually High-Performance Computational Solutions in Protein Bioinformatics (SpringerBriefs in Computer Science). This book that is qualified as The Hungry Hillsides can get you closer in growing to be precious person. By looking way up and review this book you can get many advantages.
