Outline Maps on File (Facts on File) Facts on File

"Outline Maps On File[trademark], Revised Edition" is the ultimate source for 300 reproducible maps that indicate physiographic features of individual countries, island groups, states, Canadian provinces, continents, and major geographical regions - without labels. New to this edition is shaded relief, which helps users determine the unique terrain of each country. Boundaries and territories have been updated, and more physical features, such as rivers and mountains, have been added. Label the world your way - each map contains only the unlabeled major physical features of a particular area and is accompanied by a scale and a north indicator, allowing users to customize and create their own maps. Use our symbols as your guide - the inclusion of major rivers, cities, and other important features offers a solid geographical foundation for study and testing. This revised edition also provides a legend of symbols to help users differentiate the many physical features each map details.
