Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) D. Bailin, Alexander Love

Cosmology in Gauge Field Theory and String Theory focuses on the cosmological implications of the gauge theories of particle physics and of string theory.

The book first examines the universe's series of phase transitions in which the successive gauge symmetries of the higher-temperature phase were spontaneously broken after the big bang, discussing relics of these phase transitions, more generic relics (baryons, neutrinos, axions), and supersymmetric particles (neutralinos and gravitinos). The author next studies supersymmetric theory, supergravity theory, and the constraints on the underlying field theory of the universe's inflationary era. The book concludes with a discussion of black hole solutions of the supergravity theory that approximates string theory at low energies and the insight that string theory affords into the microscopic origin of the Bekenstein-Hawking entropy.

Cosmology in Gauge Field Theory and String Theory provides a modern introduction to these important problems from a particle physicist's perspective. It is intended as an introductory textbook for a first course on the subject at a graduate level.

From reader reviews:

James Drennan:

The event that you get from Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) could be the more deep you excavating the information that hide inside the words the more you get serious about reading it. It does not mean that this book is hard to know but Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) giving you excitement feeling of reading. The writer conveys their point in specific way that can be understood simply by anyone who read this because the author of this e-book is well-known enough. This kind of book also makes your own personal vocabulary increase well. Making it easy to understand then can go along with you, both in printed or e-book style are available. We suggest you for having this particular Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) instantly.

Jerry Lyon:

Information is provisions for people to get better life, information currently can get by anyone at everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider if those information which is inside the former life are difficult to be find than now's taking seriously which one works to believe or which one the resource are convinced. If you obtain the unstable resource then you have it as your main information you will see huge disadvantage for you. All those possibilities will not happen in you if you take Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) as the daily resource information.

John Lambeth:

Playing with family inside a park, coming to see the ocean world or hanging out with buddies is thing that usually you may have done when you have spare time, after that why you don't try issue that really opposite from that. Just one activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics), you can enjoy both. It is great combination right, you still desire to miss it? What kind of hangout type is it? Oh seriously its mind hangout people. What? Still don't have it, oh come on its referred to as reading friends.

Mary Gobeil:

Do you like reading a publication? Confuse to looking for your best book? Or your book ended up being rare? Why so many concern for the book? But virtually any people feel that they enjoy with regard to reading. Some people likes reading, not only science book but additionally novel and Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) or maybe others sources were given knowledge for you. After you know how the great a book, you feel would like to read more and more. Science guide was created for teacher or students especially. Those guides are helping them to increase their

knowledge. In some other case, beside science publication, any other book likes Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) to make your spare time a lot more colorful. Many types of book like here.
